

# Vegetarian Pancreatin

## Comprehensive Digestive Enzymes from Plants

It's great to feel energized after eating a good meal. But with a busy schedule, you might not always be able to eat well. And if you are eating in a hurry, your body might not have the time or energy to make enough digestive enzymes. The result: your food doesn't get broken down enough to release the energizing nutrients.

To reclaim your nutrients, Source Naturals, the science company, brings you VEGETARIAN PANCREATIN, a vegetarian version of a comprehensive digestive enzyme system. This formula contains a broad range of enzymes to help you break down your food so you can get the revitalizing nutrients.

## A Powerful Digestive Aid from Plants

Strong digestion is an important health goal. But you don't always have time to focus on having a relaxing, nutritious meal. To help promote healthy digestion, Source Naturals introduces VEGETARIAN PANCREATIN, a vegetarian version of an array of digestive enzymes, so your body can use the nutrients in your food to keep you vibrant.

### Comprehensive Digestive Action

VEGETARIAN PANCREATIN is a vegetarian version of pancreatin. All forms of pancreatin contain enzymes such as protease to break down proteins into amino acids, amylase to break down carbohydrates into smaller saccharides and lipase to break down fats into fatty acids. These food grade enzymes are even able to partially break down the gluten in wheat for your added digestive comfort.

### Suitable for Many Environments

VEGETARIAN PANCREATIN is also more versatile than animal-derived pancreatin. This vegetarian pancreatin works in a wider pH range than animal pancreatin, so it can break down food

particles in the highly acidic stomach, as well as in the more neutral intestines. The animal-based pancreatin only works in more neutral environments such as the intestines.

### Popular Efficacy

This vegetarian pancreatin is a key ingredient in the best-selling ESSENTIAL ENZYMES™. ESSENTIAL ENZYMES is a popular product because it addresses systems instead of just symptoms\*. And it works. By increasing the breakdown of nutrients in the digestive system, the result is fewer symptoms\* of indigestion as well as better nutrient availability. And VEGETARIAN PANCREATIN has 475 mg of 4x USP strength pancreatin, which contains 68% more protein enzyme power than ESSENTIAL ENZYMES™.

Source Naturals is pleased to partner with your local health food store to bring you the unique health benefits of VEGETARIAN PANCREATIN. Include this vegetarian enzyme system in your plan for better digestion today.
